

Phone Booth/Meeting Pod/Private Office/Education
Training Music Instrument Practice/Live Streaming

CUBOCAB.COM 

Product Instruction

Prodec Acoustic Booth is a soundproof and private space which can be moved and disassembled. It is widely used in office, musical instrument training, education, live streaming and other fields.

Our booth structure consists of supporting frame made from aerospace-grade aluminum profiles, aluminum honeycomb panels and tempered glass, which you can find in high speed rail train. All aluminum materials are fireproof, no odor and stable, so that it reaches the fireproof and environmental protection requests. Acoustic PET panels are used for the interior wall and ceiling, with nylon carpet on the floor, achieving the required acoustic performance.

Product Features

Ventilation System

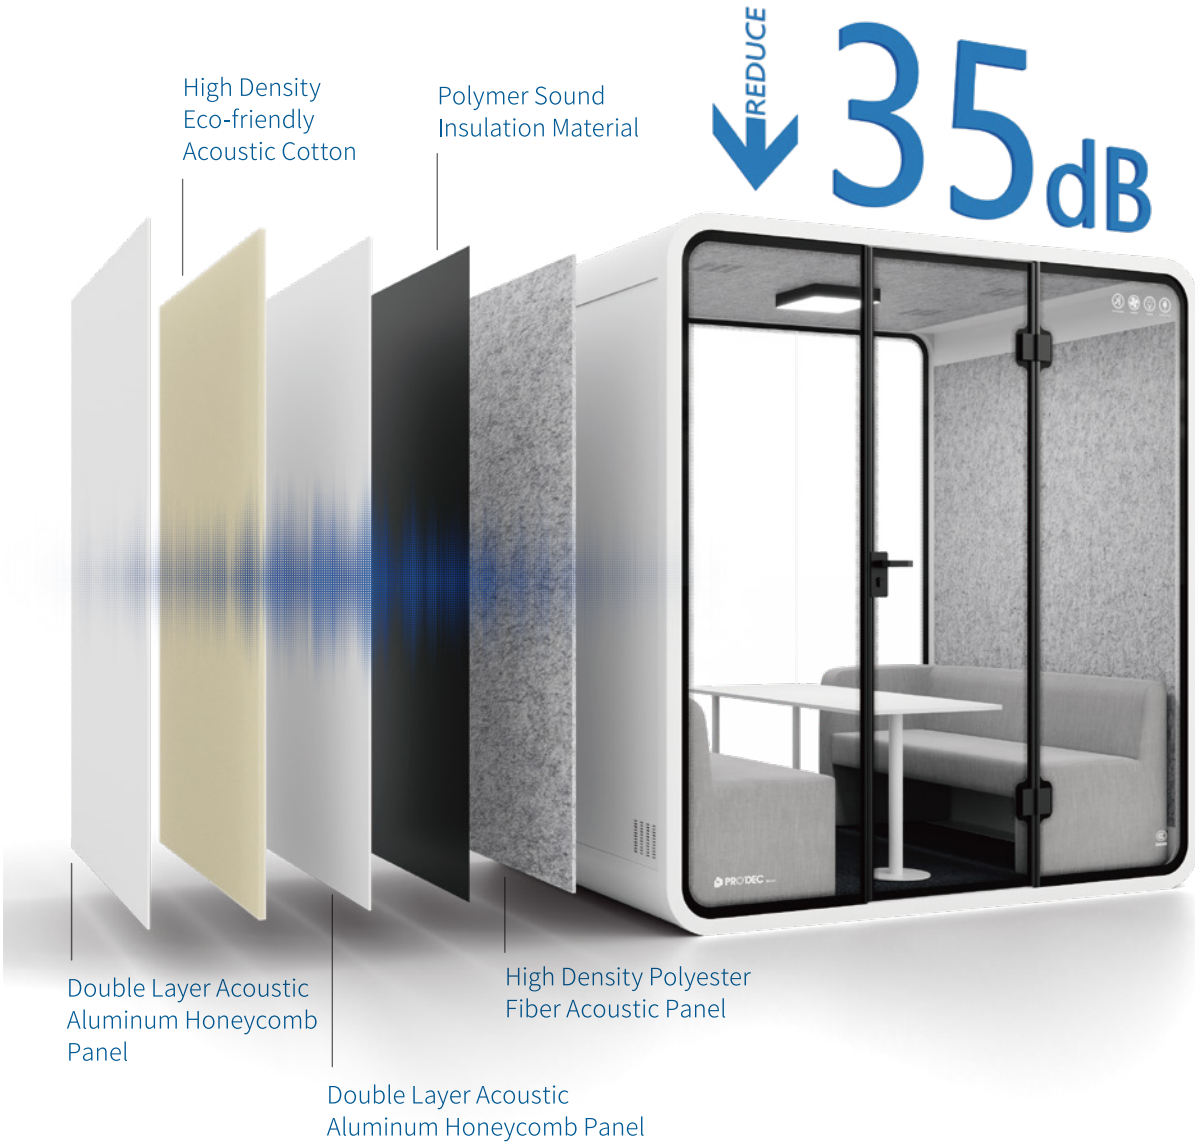

2 mins

Air Circulation

We made a multiple sound barrier for the ventilation tunnel to lower the noise of ventilation fan, meanwhile, the sound barrier can also reduce much of the sound transmission.

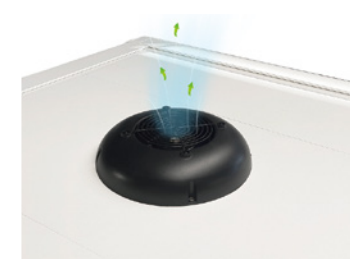

Sound Insulation

NRC: 35dB (±5dB)
RT(s): 0.25s

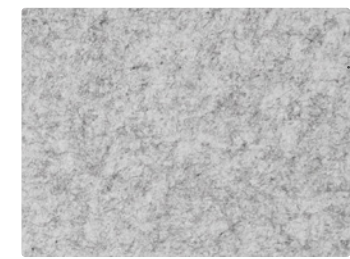

The Prodec Acoustic Booth features a 38mm thick double-layer aluminum honeycomb panel with high-density damping sound insulation. It's designed for optimal acoustic environment.

Product Features

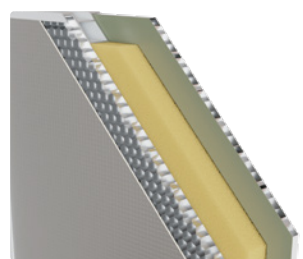

Low noise ventilation system

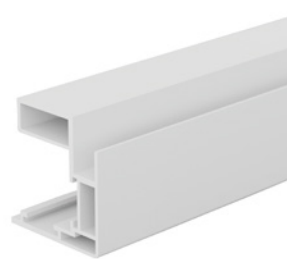

Polyester fiber sound-absorbing board

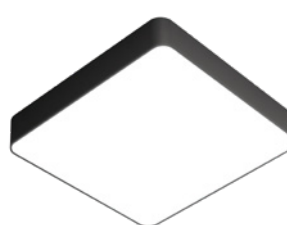

Adapt to two-control switches

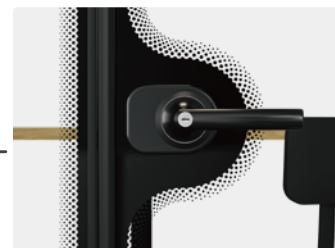

Class A1 flame retardant material

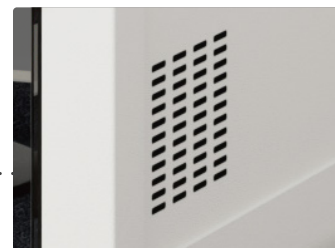

Aerospace Aluminum

4000K ceiling light

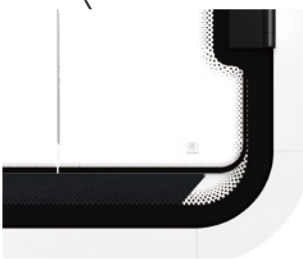

Silent door lock

Air circulation outlet

Nylon carpet

3C certified sound insulation tempered glass

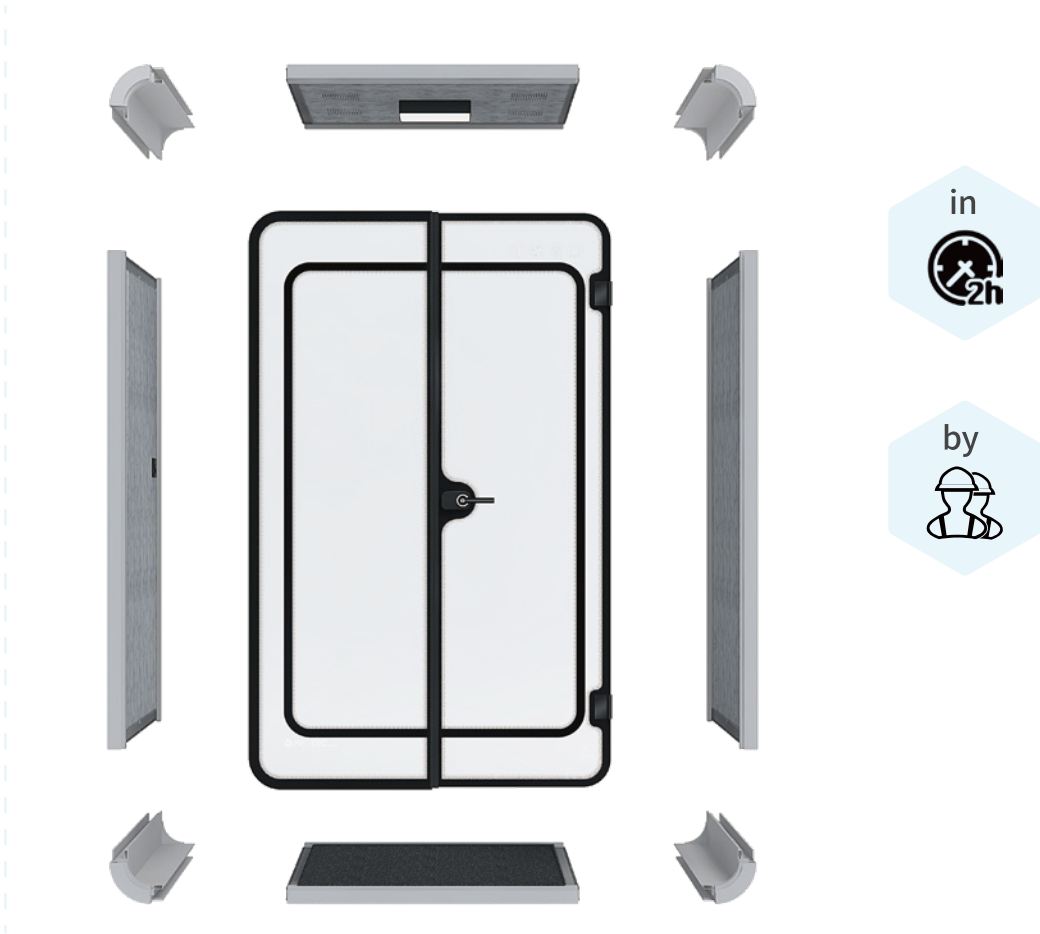

Modules Design

Standardized Modules : Prodec’s system is built around six key modules.

Endless Possibilities : With Prodec, you have the freedom to create various configurations and adapt the space as needed.

Whether it’s an office, retail area, or residential setting, Prodec’s modular fit-out system provides endless design possibilities.

- > **Top Modules**
The upper part of the structure.
- > **Bottom Modules**
The lower part that forms the base.
- > **Door Modules**
The entry point.
- > **Wall Modules**
The vertical panels that enclose the space.
- > **Easy Assembly System**

Product Applications

01 Phone Booth

02 Meeting Pod

03 Interview

04 Study Pod

05 Live Steaming

06 Musical Room

07 Reading Room

08 Rest and Sleep

09 Smoking Pod

01 Phone Booth

When in the communication with customers, are you worried that your background noise may cause a bad experience? Are you worried that your phone calls may affect your colleagues? In an open-plan office environment, a private and soundproof phone booth is essential to provide a privacy space.

02 Meeting Pod

Company meeting rooms are not enough to hold multiple meetings at the same time.

Most of the time, a 2-6 persons group meeting only requires a small space for internal meetings and negotiating with customers. Our Acoustic Booth can perfectly solve this demand and fully improve the efficiency of the meetings.

03 Online Interview

Our acoustic booths can be used in many places in universities, such as online interview, reading and so on.

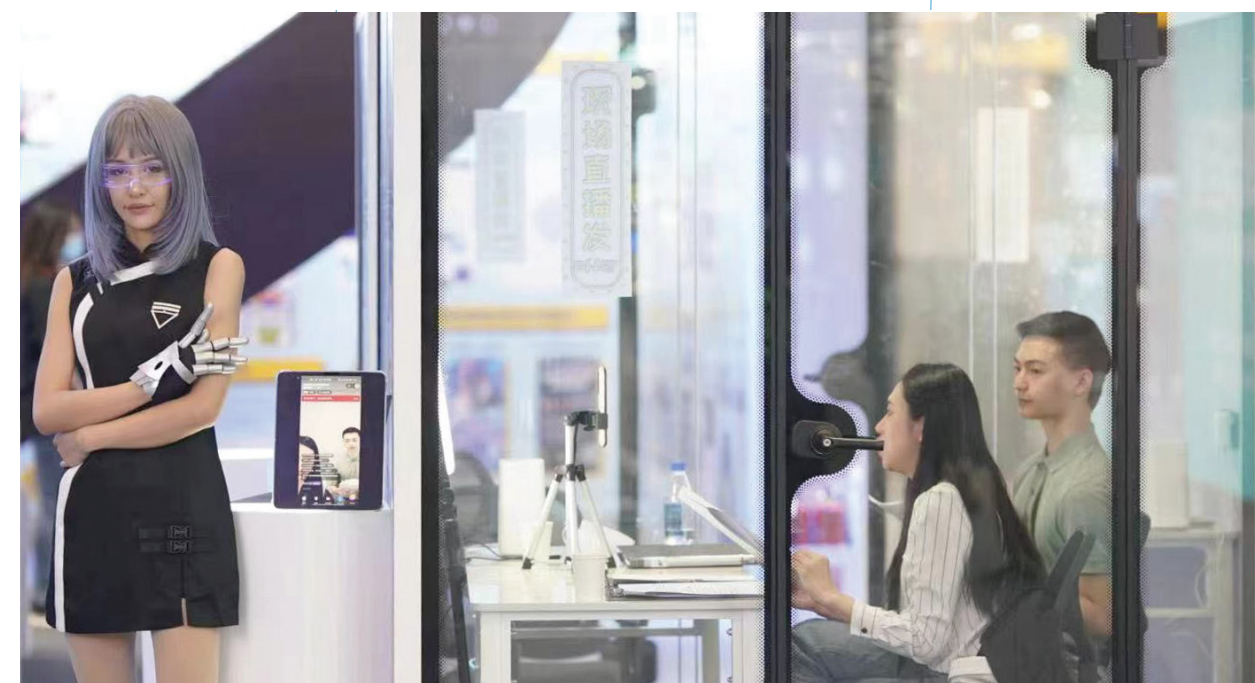

04 Study Pod

Placing study pods in the public area of the building increases the learning space for students, alleviates the pressure of insufficient seating in the study room, and provides a more private learning environment for students. Students can focus more on self-study postgraduate entrance examination interviews, job interviews, remote meetings, remote exams and so on.

05 Live Steaming

Live streaming is more and more popular. The function of privacy and soundproofing of the acoustic booth is perfect for live streaming.

06 Musical Room

It has always been a headache that practicing musical instruments would disturb your neighbors. Our Acoustic Booth can be an instrument training room with good sound insulation. It can solve the noise problem of musical instruments and has an acoustic environment for performance.

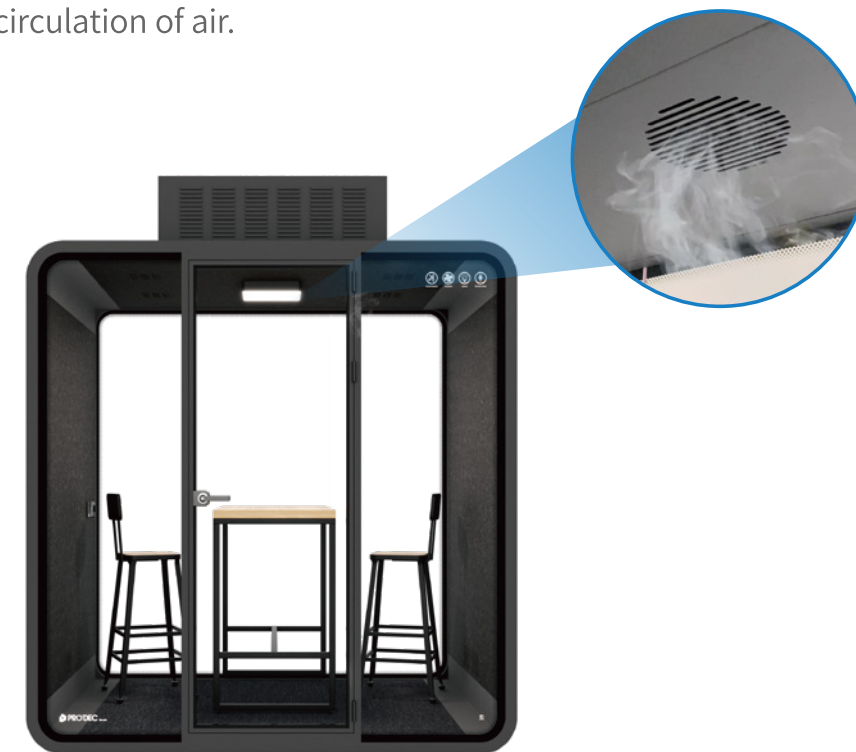

07 Reading Room

A quiet and exclusive space is a necessary condition for reading. Acoustic Booth provides a quiet space for reading and learning.

08 Smoking Pod

Smoking is prohibited in certain public settings, while the smoking pods provide a smoking area for smokers in these public places. The unique fresh air system brings fresh air from the external environment into the pods, and then filters the smoke into odorless and harmless air before discharging it to the external environment, forming a circulation of air.
